

DAVID JÖNSSON

DATA SCIENTIST & ENGINEER

SUMMARY

Results-oriented **Data Scientist and Engineer** with a unique dual background in Industrial Engineering and Management (M.Sc. in Data Science, 300 ECTS) and Law (105 ECTS). I have **proven experience building ML models**, especially with my Master's research at the Swedish Defence Research Agency (FOI) which applies **Transformer models** to chemical structure prediction, which will be **published later this year**. I **completed my 5-year M.Sc. in just 4 years** (often 125–200% study pace), demonstrating rapid learning, strategic planning, and a drive to go above and beyond expectations. I aim to create transformative solutions that provide real value, focusing on what's important to the end user. I think, that with my unique profile (Data Science + AI + Compliance), I am well-positioned to excel in many positions.

CONTACT

- **Phone:** [+46 722 00 24 25]
- **Email:** [david.w.umea@gmail.com]
- **LinkedIn:** [www.linkedin.com/in/david-j-6b9339125/]

PERSONAL DATA

- **Date of Birth:** 1999-12-08
- **Nationality:** Sweden
- **Languages:** Swedish (Native), English (Professional)
- **Security Cleared:** I.e. no criminal records/drugs

EDUCATION

Master's Thesis | Umeå University, Sweden

- **Transformer Architecture Implementation:** Developing "SpecTUS," a Transformer-based encoder-decoder model that treats mass spectral data as a sequence-to-sequence translation task.
- **Fine-Tuning & Data Scarcity:** Implementing a "forward-inverse loop" strategy to pre-train models on synthetic data before fine-tuning on experimentally curated datasets, addressing data scarcity and the "long tail" problem.
- **Complex Data Curation:** Curating and preprocessing a dataset of 300,000 samples (NIST), utilizing tokenization methods (SELFIES) to prevent invalid syntax generation in machine learning outputs.

M.Sc. Industrial Engineering & Management | Umeå University, Sweden

2022/08 – 2026/06 (Accelerated Track)

- **Accelerated track:** Completed my 5-year M.Sc. in just 4 years (often 125–200% study pace)
- **Specialization:** Data Science, Machine Learning and Financial Management

Law Programme (Juristprogrammet) | Umeå University, Sweden

08/2020 – 01/2021

- **Scope:** 105 ECTS (approx. 2 years full-time).
- **Relevance:** Gained deep understanding of Civil Law, EU Regulations, and the legal workflow.

RELEVANT WORK EXPERIENCE

Teaching Assistant (Python) | Umeå University

08/2025 – 2026-01-01

- Guiding first-year engineering students through **Python programming** fundamentals.

Business Intelligence Intern | BAE Systems

Häggglunds, Sweden, 06/2025 – 08/2025

- Investigated the utility of **LLM AI Agents**, its potential and created a 10 page document around how to implement it in the defense sector.
- Held lectures for the procurement department (120 people) about effective **LLM Prompt Engineering** and built **Power BI** solutions to visualize complex workflow bottlenecks.

OTHER EXPERIENCES

Sports event Coordinator | Umeå University

08/2022 – 06/2026

- Planned Sports-related events for the institution

Project Manager: Lawyers Day | Law Student Association at Umeå University, 2021

- I shared overall responsibility with two others for Juristens Dag, the largest career fair for the Law Program at Umeå University. We managed a budget of nearly half a million SEK and led a team of 14 people to ensure the success of the event, which hosted around 40 participating companies.

Young Entrepreneurs Nordic Meetup, 2017

- Selected as one of ten individuals under the age of 36 to represent Sweden at this networking event in Helsinki.

Scholarship | Indivator, 2017

- Scholarship worth 10 000 Sek for an entrepreneurship course.
